

BED BATH & BEYOND®

PRIORITY CHEMICAL LIST

Policy Number	BBBPO-0017, V1.1
---------------	------------------

Bed Bath & Beyond Inc. and its subsidiaries (collectively, the “Company”) are committed to providing customers with safe, high quality products. To that end, the Company is issuing the below **Priority Chemical List**, which is a subset of its Restricted Substances List (“RSL”), to further reduce the use of certain chemicals of concern in household cleaning, personal care, and cosmetic products. In addition, the Company is responding to customers’ growing interest in ingredient disclosures by committing to ingredient transparency in certain private label products.

It is the Company’s expectation that vendors of all household cleaning, personal care, and cosmetic products will remove, or at minimum, reduce the use of Priority Chemicals in their products, including parabens, phthalates, formaldehyde donors, NPEs, Toluene, and Triclosan. In moving to eliminate these chemicals from formulations, the Company expects suppliers to select ingredients identified as Safer Chemicals by the U.S. Environmental Protection Agency (EPA) Safer Choice program, or to use EPA Safer Choice criteria or the safer alternatives Marketplace to evaluate and select safe substitutions. See <https://www.epa.gov/saferchoice/safer-ingredients>. The Company also encourages all vendors of household cleaning, personal care, and cosmetic products to include ingredient disclosures on product packaging.

The Company is particularly committed to eliminating Priority Chemicals from private label baby personal care products. The Company is working collaboratively with suppliers to evaluate private label baby personal care products and to reformulate where necessary to eliminate intentionally added Priority Chemicals from those products, including in fragrances, by the end of 2020. In addition, the Company will strive for ingredient disclosure on private label baby personal care products both on-line and on product packaging beginning in 2020.

The Company will continue to engage with various stakeholders and industry partners to stay abreast of scientific developments and industry best practices regarding chemicals of concern. Over time, the Company will work towards expanding the product categories and brands covered by the Priority Chemical List and ingredient disclosure requirements.

Family	Chemical Name	CAS#
<i>Parabens</i>	<i>Isobutylparaben</i>	<i>4247-02-3</i>
<i>Parabens</i>	<i>Ethyl paraben</i>	<i>120-47-8</i>
<i>Parabens</i>	<i>sodium propyl paraben</i>	<i>35285-69-9</i>
<i>Parabens</i>	<i>sodium butyl paraben</i>	<i>36457-20-2</i>
<i>Parabens</i>	<i>potassium butylparaben</i>	<i>38566-94-8</i>
